

From the desk of

J. GARY SHAW

4-14-81

Dear Harold -

Enclosed are the copies of different versions of the paper sack report as requested. Both are purported to be CHL 5 p. 129, and both are from the archives in Washington. Of particular note, according to Earl Goly:

1. Lemberling report of 1-7-64: "samples did not compare favorably."

Lemberling Supplementary report of 1-13-64: "samples compared favorably."

2. The only other typed page number in CHL 5 is page 1a which also refers to the paper bag.
3. The archivist in Washington

From the desk of

J. GARY SHAW

says that the "not to be identical" version of the document is in the Carl Day name file and that the "same observable characteristics" version is in CD 5.

Hope this helps... good luck.

Talked with Gary Mack today and he is dropping you a line. He has changed jobs which is the reason for his delay in writing.

Best wishes and do hope you are in good health.

Dary
